I have won various math competitions since I was at the elementary level and physics competitions since I was at the junior high school level. Now I am an undergraduate computer scientist. I have great interest in the field of data science and web application. I really wish I am given a chance to work in your company.

## EXPERIENCE

MAY 2019 – AUGUST 2019

**SOFTWARE ENGINEER INTERN, BLIBLI.COM**

I made mostly front end for web applications and mobile for Blibli.com. Specific details of my work cannot be posted due to confidentiality reasons.

## EDUCATION

AUGUST 2016

**BACHELOR OF ENGINEERING, INSTITUT TEKNOLOGI BANDUNG**

My GPA is 3.27. I made various courseworks, including making website using Node.js and Angular.js, developing website using Laravel, front-end and back-end, making simple databases using PostgreSQL and MySQL, making spam detector using NLP, making peer-to-peer collaborative editing using CRDT, and many more.

## SKILLS & TOOLS

- JS (Vue.js, Angular.js, Node.js)
- Python
- R
- TensorFlow
- mySQL
- postgresSQL
- Git
- Jest (JavaScript Testing)

## ACTIVITIES

Aside of taking courses, I was a head of division at Arkavidia, an event held by Informatics Student Association of Institut Teknologi Bandung. I also joined ITB Student Orchestra as staff.
