PROJECTS

PEER-TO-PEER COLLABORATIVE EDITING
Used CRDT to make a collaborative text editor. This text editor helps the user to edit documents consistently and concurrently without coordination between two or more users.

JABAR FORM REG DISKOMINFO
Used Laravel framework and Bootstrap to make a form registration web app for West Java Government. This web app saves documents made manually from the government.

MDM PERTAMINA
Used various web frameworks to create data cleansing and marketing campaign app for Pertamina. This web app formulates data gathered from customers to help Pertamina in creating company marketing strategies.
